European Development Plan

European Development Plan The EDP of our school joins a macro project in which the internationalization assumes a very important aspect. The Law 107/2015 approved by MIUR to change Italian school system and to give a new position of its Educational system in the digital era, is based on /bases on PNSD. It's a plan for the innovation for Italian schools, with programmes and actions organized in five main areas: tools, competences, contents, staff training and support measures. For each of them, we have defined our objectives joined to specific actions to improve the competences/skills of our school through a process of internationalization, started by different experiences such as interviews to mothertongue.

Besides, our school has triggered a big investment in new technologies; actually there are LIMS in Primary and Secondary (11-13) class. Considering the strong demand for staff training, there is a greater awareness of the importance of multimedia that can be an important tool for languages learning too. In the drafting of our EDP, we have considered these objectives:-

- our institute is aligned to the European objectives on training program working on the key citizenship skills;
- promote the qualitative development of the educational activity through differentiated itineraries that potentiate the development of the individual, through sharing and mutual exchange, improving pupils' attendance and performance;
- widen and deepen the use of innovative didactic methodologies, to support the process of modernization and internationalization of learning but also to respond to pupils' requirements with special education needs promoting their inclusion;
- widen the training offered and cultural horizon of our institute, implementing the European dimension of the curriculum, through the comparison and experience exchanges;
- Foster the contacts with training institution and participants, to support the advancement of mobility actions and enhance teachers and pupils' cultural exchanges ;
- Have a constructive exchange with foreign colleagues about criteria and the various forms of assessment of our Institute.

To make sure that these objectives became daily practices, we focus on three specific macro objectives:

- 1.Promote the active European citizenship;
- 2.Definition and exchange of good practices in education;
- 3.Recognition and validation of skills through the use of European tools.

Our Institute is going to activate these international steps in order to achieve the above mentioned objectives:

Ministero dell'Istruzione, dell'Università e della Ricerca

ISTITUTO COMPRENSIVO

Matteo Della Corte *Pompei*

Via Astolelle - 80045 -Pompei (NA) Tel/Fax 0818631747 codice fiscale 82011670633

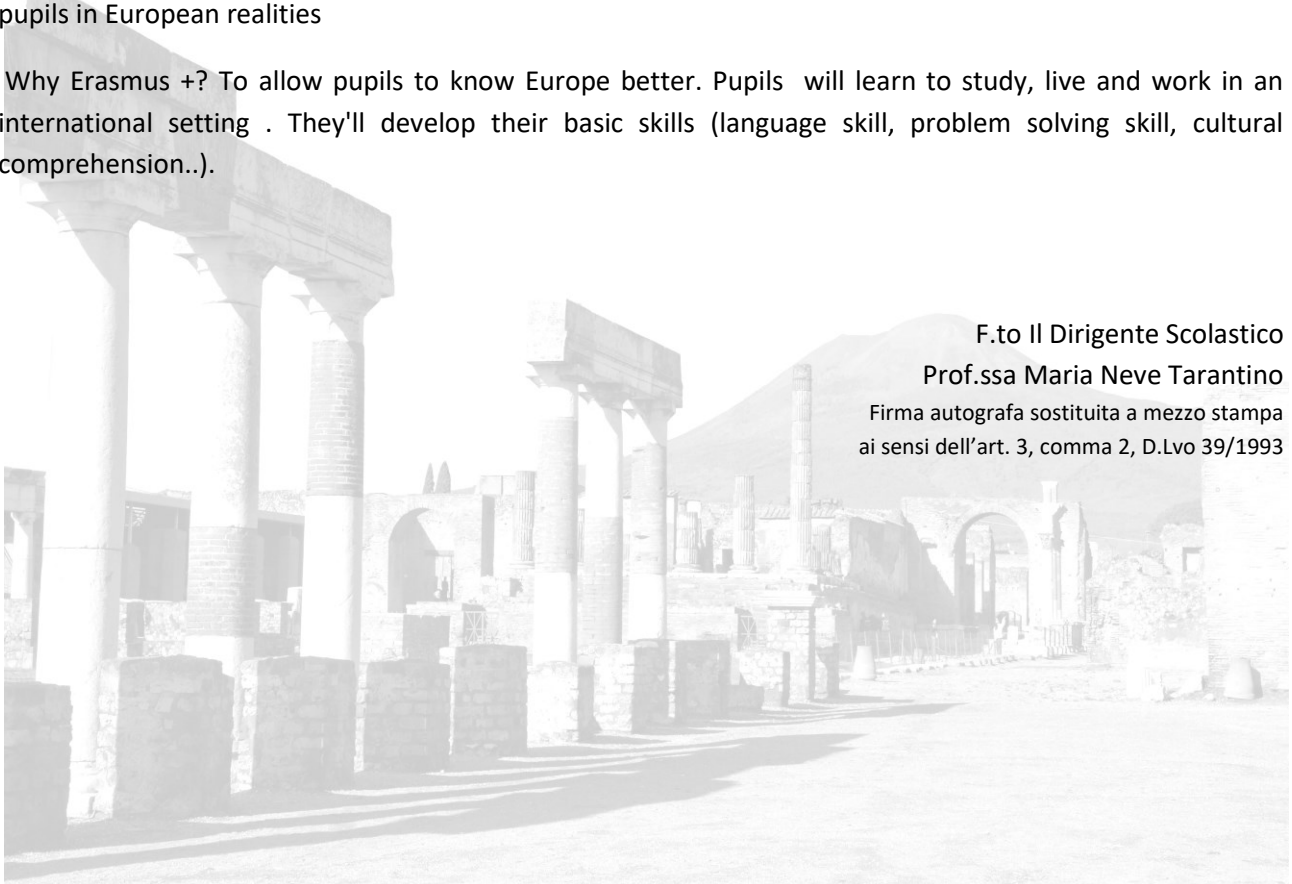

e-mail: naic8b400d@istruzione.it sito web: www.matteodellacorte.edu.it

- Pupils' mobility in related educational and professional realities will help them to develop, in the diversity, a sense of belonging and a common market and promote in the school a European dimension as a prerequisite for international cooperation;

-ICT/inclusion(The scholastic organization too).

To achieve these objectives, our school is arranging Erasmus + project, finalized to the cultural exchange of pupils in European realities

Why Erasmus +? To allow pupils to know Europe better. Pupils will learn to study, live and work in an international setting . They'll develop their basic skills (language skill, problem solving skill, cultural comprehension..).
